

JAKUB POPIOLEK

FULL STACK DEVELOPER

SKILLS

Operating Systems:

- Linux, Windows

Databases:

- PostgreSQL, MySQL

Languages:

- JavaScript, TypeScript, Java, Python, C#, Go, SQL, HTML5, CSS3

Software and Tools:

- Node.js, Angular (18/19), NgRx, AWS, Spring Boot, Flyway, Git, Jenkins, Github Actions, React Native, .Net

Methodologies:

- Scrum, Kanban

Professional

- Effective communication
- Team player
- Strong problem solver
- Great time management
- Fast learning

EDUCATION

Master of Mathematics in Mathematics and Computer Science

University of York, 2019-2024

LANGUAGES

English (Native)

Polish (Native)

PROFILE

Professional Full Stack Developer specialized in JavaScript and Java, with solid experience creating high-quality software solutions tailored to project specifications and client needs.

- 3+ years of experience developing full-stack applications using Java (Spring Boot), Angular (v18/v19), TypeScript, and C# (.NET Core), with solid backend skills including PostgreSQL and API design.
- Familiarity with cloud computing, with hands-on experience using AWS.
- Holds an MSc in Mathematics and Computer Science, combining strong analytical skills with practical software engineering experience.

WORK EXPERIENCE

Poler, Full Stack Software Engineer

OCT 2024 - PRESENT

- Architected and built an end-to-end private-assets investment platform using React Native, C# (.NET 8), Go, CMS (Strapi) and PostgreSQL, owning the entire system design and implementation.
- Designed a security-first architecture, centralising authentication and authorisation to reduce attack surface and simplify compliance.
- Implemented a high-reliability backend with resiliency pipelines (Polly), transactional consistency, and code-first database migrations, including safe rollback strategies for partial failures.
- Built and maintained engineering workflows using GitHub Actions.

Technologies: React Native, JavaScript, TypeScript, .Net 8.0, C#, Go, Strapi, SQL, PostgreSQL, Github Actions, Postman,

Informed Solutions, Software Engineer

OCT 2024 - OCT 2025

- Worked across the full stack using Angular (v19), TypeScript, and NgRx on the frontend, and Java (Spring Boot) on the backend with PostgreSQL and Flyway migrations.
- Developed and maintained features for a secure government application, meeting strict testing standards including 80%+ unit test coverage across frontend and backend codebases.
- Contributed to CI/CD pipelines using Jenkins and supported planning for a migration to GitHub Actions, collaborating closely with clients and cross-functional delivery teams to meet compliance and functional requirements.

Technologies: Node.js, JavaScript, TypeScript, Angular, Java, Spring Boot, PostgreSQL, pgAdmin, Jenkins, Jira

Informed Solutions, Software Engineer

JUNE 2021 - JULY 2022

- Integrated an external file-store API using AWS Lambda to automate document ingestion into S3, including categorisation and data-cleanup logic, with deployments managed via GitHub Actions.
- Contributed to the design and integration of a machine-learning document classification workflow, defining data structures and input pipelines.
- Developed WCAG-compliant frontend features for a government-facing web application using Angular (v18) and TypeScript, working in a cross-functional Scrum team to deliver accessible public-sector services.

Technologies: Node.js, JavaScript, TypeScript, Angular, C#, AWS Lambda, S3, EC2, Java, Spring Boot, GitHub Actions, Jira
